

CoffeeTalk@ISOF

Join us at 14:30

– ISOF 12 – Meeting Room (1st floor)

CNR Research Area, via Gobetti 101, Bologna

11 Feb	Daniele Tedesco	Applications of circular dichroism spectroscopy to the investigation of drug-target interactions
03 Mar	Massimiliano Curcio	Ethereal Love: promoting ring-ring interactions in a [3] rotaxane
10 Mar	Elisabetta Pancani	Development and advanced characterization of polymeric nanoparticles for drug delivery
24 Mar	Filippo Valorosi	Multifunctional GRM enhanced-composites: potential applications in automotive and aerospace sector
07 Apr	Fabrizio Vetica	trans Cardiolipin: from synthetic and analytical aspects to reactivity studies on biomimetic models
21 Apr	Antonio Bianchi	GO-enhanced membranes for tap water purification
05 May	Ahmed Zubair	Red and Near infrared Light Emitting Lanthanide Metal Complexes for the Electroluminescent Devices
19 May	Federico Nicoli	Towards a light activated molecular transporter
09 Jun	Giada Belletti	PLA water based coatings for recyclable and biodegradable flexible packaging paper materials
23 Jun	Alex Boschi	Charge transport in graphene-based networks: toward realistic systems
07 Jul	Emanuela Saracino	Nanostructured materials interfaces and device targeting growth, differentiation and the functional analysis of glial cells
